Hemlock, MI 48626**

Hemlock Semiconductor is a world leader in the production of hyper-pure polycrystalline silicon for electronics and photovoltaic applications. For Hemlock Semiconductor Group, recognizing sustainability as a guiding principle means we will:

- Work to reduce the environmental impact of our operations, now and in the future.
  - Identify ways to improve the health and safety performance of our operations, products, and services, both in our own facilities as well as in our customers' facilities.
- 
- Work with our customers to develop products and services for new markets.
  - Expect our suppliers and customers to support sustainable business practices.
  - Recognize that continuously improving the health, safety, and well-being of our employees and the people in the communities where we live and work is critical to our ongoing success.
